CABLE PULLING BELTS

COVER : abrasion, oil and grease, or heat resistant
black or white rubber, hardness 40 to 70 ShA.
(ask us for other cover)

ENDLESS LENGTH : up to 20 meters (*)

WIDTH : up to 300 mm.

CARCASS : 2 to 4 textile plies wound up (no junction)
or wound up cord (Rayon or Aramid)
or metallic carcass

TENSILE STRENGTH : up to 1600 kgs per cm of belt width
(that is to say 1600 N/mm).

CHARACTERISTICS : endless belt without junction : no overthickness
can work on small pulley diameter
traction in a straight line at varied speeds

PERSONAL FINISHING : machining from the block :
grindings, grooves, poly-V, ...

* measured inside with the belt laid flat
